SEAT NO. CT - 25075

NED UNIVERSITY OF ENGINEERING & TECHNOLOGY

FIRST YEAR (MECHANICAL/ TEXTILE/ INDUSTRIAL & MANUFACTURING/ AUTOMOTIVE/ ELECTRICAL/ COMPUTER SYSTEMS/ ELECTRONIC/ TELECOMMUNICATIONS/ SOFTWARE/ BIOMEDICAL/ COMPUTER SCIENCE/ PHYSICS/ CHEMISTRY/ TEXTILE SCIENCES/ ENGLISH LINGUISTICS)

FALL SEMESTER EXAMINATIONS 2025

BATCH 2025

Dated: 15-DEC-25

Time: 3 Hours **Max.Marks:60**

Functional English– EA-128

Instructions: Answer all six questions. Each question has two parts (a and b). Provide answers in answer sheet. Use a new page for a new question. Be clear and precise in your answers.

SECTION A: READING COMPREHENSION [CLO 2]

Why We Must Teach Children to Understand Feelings?

Q1. Read the Given Passage carefully and answer the questions that follow: (10 marks)

Emotional literacy, the ability to recognise, understand, express and regulate emotions in oneself and others, is increasingly recognised as a fundamental component of human development. While cognitive and academic skills have traditionally dominated educational priorities, recent research emphasises that emotional understanding in early childhood significantly influences long-term social, psychological and academic outcomes.

From birth, infants communicate basic emotional states through non-verbal cues such as crying, smiling and body movements. However, as children enter preschool and primary education, they encounter complex social situations that require more than instinctive reactions. Conflicts with peers, disappointment with academic tasks, and interactions with authority figures demand the capacity to identify specific emotions and respond appropriately. Children who lack these skills often resort to aggression, withdrawal or prolonged distress.

Developing emotional literacy involves several key processes. First, children must acquire an adequate emotional vocabulary. When a young child experiences frustration, an adult's intervention such as "You seem angry because the tower fell" not only labels the emotion but also links it to its cause. Longitudinal studies demonstrate that children exposed to explicit emotion labelling by age four display greater emotional regulation by age seven.

Second, narrative practices play a critical role. Reading stories or watching scenarios that depict characters experiencing joy, fear, sadness or anger enables children to adopt the perspective of others—a skill known as theory of mind. Guided questions such as "How do you think the character feels?" and "What could help them feel better?" encourage empathy and moral reasoning.

Third, structured social play provides practical training in negotiation and compromise. When two children desire the same resource, adult facilitation that highlights mutual feelings ("How does it feel when someone takes your toy?") transforms potential conflict into a learning opportunity about fairness and reciprocity.

Empirical evidence supports the value of systematic emotional education. A controlled study involving kindergarten children who participated in a ten-week emotional literacy programme showed marked reductions in disruptive behaviour and significant improvements in peer relationships compared to a control group. Teachers reported enhanced classroom climate and increased student engagement.

Parental modelling is equally influential. Adults who articulate their own emotions ("I feel disappointed because the meeting was cancelled, so I need a few minutes alone") demonstrate that emotional experience is universal and manageable. Conversely, suppressing or aggressively expressing emotions teaches children that feelings are either shameful or uncontrollable.

Several education systems have integrated emotional literacy into formal curricula. In Finland, daily "emotion check-ins" allow students to name their current emotional state in a non-judgmental environment. Longitudinal data from such programmes correlate with higher levels of student well-being and lower incidence of bullying.

Despite resource constraints, even brief daily interventions yield results. Simple classroom tools—emotion charts, role-play activities, or short reflective discussions—require minimal preparation yet foster substantial growth in emotional competence.

Ultimately, emotional literacy is not an optional "soft skill". It underpins conflict resolution, mental health resilience, and the capacity for meaningful relationships. Societies that prioritise emotional education in early years invest in more cooperative, empathetic and psychologically healthy future generations.

1(a) Multiple Choice Questions (4 marks)

1. According to the passage, infants primarily communicate emotions through
   A) long sentences B) non-verbal cues C) writing letters D) phone calls
2. What is the main purpose of adult intervention like "You seem angry because the tower fell"?

P.T.O

A) to punish the child B) to label the emotion and link it to its cause C) to make the child silent D) to give extra homework

3. "Theory of mind" is developed mainly through

A) mathematics lessons B) narrative practices and stories C) running races D) cleaning the classroom

4. The ten-week emotional literacy programme in kindergartens resulted in

A) more disruptive behaviour B) marked reductions in disruptive behaviour C) longer play time only D) lower attendance

5. Finnish "emotion check-ins" are described as

A) judgmental and competitive B) non-judgmental and safe C) only for teachers D) held once a year

6. The passage states that suppressing emotions at home teaches children that feelings are

A) always fun B) shameful or uncontrollable C) unimportant for adults D) only for girls

7. The final paragraph presents emotional literacy as

A) a luxury for rich schools B) an investment in more cooperative and empathetic future generations C) something that can wait until university D) less important than academic subjects

8. Parental modelling is important because children

A) copy adult emotional expression B) ignore adult behaviour C) only learn from teachers D) are born emotionally literate

1(b) Short Answers (6 marks)

9. Why does the writer say that emotional literacy is "not an optional 'soft skill'"? Support your answer with evidence from the passage.

10. Based on the passage, infer what might happen in a classroom that never teaches children to name or discuss emotions. Give one specific consequence mentioned or implied.

11. In your own words, explain how reading stories helps develop "theory of mind" in children.

12. Why does the writer describe emotional literacy as an "investment" in future generations?

2(a) Add a suffix or prefix to make a new word. Write the new word and its meaning. (2 marks)

1. happy + _____ → _____ (meaning: _____)
2. _____ + understand → _____ (meaning: _____)
3. calm + _____ → _____ (meaning: _____)
4. care + _____ → _____ (meaning: _____)

2(b) Choose the correct word from the passage (1.5 marks)

5. I feel _____ (peace / piece) when I share.
6. The teacher _____ (new / knew) the child was sad.
7. We _____ (wait / weight) for our turn.

2(c) Write the meaning of the underlined word using the passage (1.5 marks)

8. "Their teachers said they were **calmer**."
9. "A bully often **feels small inside**."
10. "This gives the child **the word angry** and the reason."

2(d) Use the correct form of the given words to complete the sentences. (5 marks)

revise – expose – retain – context – associate

1. The more you are expose to a word, the easier it is to retain it.
2. I always revise new words the next day because I forget quickly.
3. Try to associate new words with pictures or personal experiences.
4. Learning words without context is not very effective.

3. Write a summary of the passage in 80–100 words. Include, Why emotional understanding matters, Two ways to teach it, and One result (Count your words and write the total at the end.)

SECTION B: WRITING TASKS [CLO 3]

lack of physical interaction
social media distracts

4. Write an essay of 200–250 words on ONE topic. (10 marks)
   a. "How Social Media Affects Gen Z Friendships"
   b. "Why Mental Health Days Should Be Normal for Gen Z"

5. Read the given job advertisement provided below to develop resume and cover letter. (10 marks)

BrightFuture Ltd. needs 10 interns for 8 weeks. Tasks: help with events, social media, office work. Open to all first-year students. Send: Resume + Cover Letter (200 words max). Email: jobs@brightfuture.com

6. Your university held a Career Fair last week. Write a report for the university's newsletter. Provide a proper title to your report. Divid the report into three sections: Introduction (when, where, how many companies), Main Activities (talks, stalls, students), and Conclusion (what students gained). (10 marks)
