## MIDTERM EXAMINATION FALL 2021

It is estimated **that over 70 per cent of North Americans, for instance, have internet access**, and this figure is steadily increasing. Physical **shops are under threat, as growing numbers shop online**. In areas such as travel it is now impossible to buy tickets on certain airlines except on the internet. The web also links together millions of individual traders who sell to buyers through websites such as Ebay.

Beyond the commercial sphere, the internet is also critically important in the academic world. A huge range of journals and reports are now available electronically, meaning that researchers can access a vast amount of information through their computer screens, **speeding up their work and allowing them to produce better quality research**. In addition, email permits academics to make effortless contact with fellowresearchers all over the world, which also assists them to improve their output.

There is, of course, a darker side to this phenomenon, which is the use criminals have made of their ability to trade illegal or fraudulent products over the internet, with little control over their activities. But such behaviour is hugely compensated for by the benefits that have been obtained by both individuals and businesses. **We are reaching a situation in which all kinds of information are freely available to everyone, which must lead to a happier, healthier and richer society.**

1. **'. . . such as the invention of the wheel, money and the telephone . . .'**

   Are these really critical developments? **[01 MARK]**

2. **'. . . the development of the internet is perhaps the most crucial of all.'**

   Is this true? **[01 MARK]**

3. **'. . . so that few people can imagine life without it.'**

   Is this claim credible? **[01 MARK]**

4. **'It is estimated that over 70 per cent of North Americans, for instance, have internet access . . .'**

   No source given. Does this figure seem likely? **[01 MARK]**

5. **'Physical shops are under threat, as growing numbers shop online.'**

   Is the first part true, and if so, is it caused by online shopping? **[01 MARK]**

6. ***'. . . speeding up their work and allowing them to produce better quality research.'***

   *If the first part is true, does the result logically follow?* **[01 MARK]**

7. ***'We are reaching a situation in which all kinds of information are freely available to everyone, which must lead to a happier, healthier and richer society.'*** **[02 Marks]**

   *Does the first part need any qualification?*

   *Is the conclusion justified?*

   *Is the writer objective or biased?* Do I agree with this argument overall? **[02 Marks]**

## MIDTERM EXAMINATION FALL 2021

50 copies

**Course Title: Academic Reading and Writing**

**Course Tutor: Ms. Asmara Shafqat**

**Course Code: HS-115**

**Section: S2**

**Total Marks: 20**

**NOTE: Attach question paper with your answer copy. Without it paper will not be accepted.**

**Q1. Read the following text and then using the paraphrasing techniques paraphrase the following text. [10 MARKS]**

### FOUR WHEELS GOOD

The growth of the car industry parallels the development of modern capitalism. It began in France and Germany, but took off in the United States. There Henry Ford adapted the moving production line from the Chicago meat industry to motor manufacturing, thus inventing mass production. In the 1920s Alfred Sloan's management theories helped General Motors to become the world's dominant car company. After the second world war the car makers focused on the styling of their products to encourage more frequent model changes. From the 1970s there was criticism of the industry due to the inefficiency of most vehicles, which used petrol wastefully. At the same time, trades unions became increasingly militant in defence of their members' jobs. Today the industry owns some of the most famous brands in the world. However, many car makers are currently threatened by increased competition and saturated markets.

**a) Find synonyms for the words underlined. [01 MARK]**

i) It began in France and Germany, but took off in the United States.

ii) There Henry Ford adapted the moving production line from the Chicago meat industry to motor manufacturing, thus inventing mass production

**(b) Change the word class of the underlined words, and then re-write the sentences. [01 MARK]**

i) After the second world war the car makers focused on the styling of their products, to encourage more frequent model changes.

ii) From the 1970s there was criticism of the industry due to the inefficiency of most vehicles, which used petrol wastefully.

**c) Change the word order of the following sentences (other changes may be needed). [01 MARK]**

*i) Today the industry owns some of the most famous brands in the world.*

*ii) However, many car makers are currently threatened by increased competition and saturated markets.*

***(d) Combine all these techniques to paraphrase the paragraph as fully as possible. [07 MARKS]***

***Q 2 Read the following text carefully , thinking critically about the sections in bold specifically. Then answer questions 1–8 and justify your answers . [10 MARKS]***

### *THE GROWTH OF THE WORLD WIDE WEB*

*the history of civilisation there have been many significant developments,* ***such as the invention of the wheel, money d the telephone, but the development of the internet is perhaps the most crucial of all.*** *In the space of a few years world wide web has linked buyers in New York to sellers in Mumbai and teachers in Berlin to students in Cairo,* ***so that people can imagine life without it.***
